GETTING STARTED WITH ROBOTICS IN REMANUFACTURING: A webinar about the basic knowledge of robots for remanufacturing and possible use cases in industrial applications

18. July 2024 - 13:00 h to 14:30 h **Online**

AGENDA:

Session 1: Presentation

- **Current trends in robotics**
  - Introduction to the latest technological developments and innovations in robotics
  - Possible areas of application for robots in companies: Increasing efficiency, reducing costs and sustainability
  - Limitations of robotics: challenges and solutions
  - Various possibilities of robotics: from production to maintenance and disposal

Session 2: Discussion and Use-Case-Analysis

- **Discussion of possible use cases in the participants' companies**
  - Presentation and evaluation of submitted use cases by our experts
  - Development of sketches and concepts for the automation of the individual remanufacturing projects
  - Interactive discussion and feedback round on the use cases presented

---

Registration and contact:
Please register by 01.July 2024 on Eventbrite:

Preparation:
We ask all who are interested to send us their specific remanufacturing use cases in advance by e-mail to m.vette-steinkamp@umwelt-campus.de
Our experts will analyse and evaluate these cases and create an outline for automation.

If you have any questions, please do not hesitate to contact us.

We look forward to your participation!

Moderators:

Prof. Dr.-Ing. Matthias Vette-Steinkamp
